PROFILE SCREEN – COMPLETE UI + FUNCTIONAL DOCUMENTATION

SCREEN PURPOSE

Primary Goal

The Profile Screen is used to:

- Display user identity
- Show connected financial accounts
- Display credit score information
- Show tagging & transaction statistics
- Provide navigation to secondary features (Web App, Contacts, Invite)

It acts as:

User account dashboard + financial connection overview + stats monitor.

COLOR SYSTEM

Theme Type

- Dark mode
 - Minimalistic
 - High contrast
-

Primary Colors

Role	HEX	Usage
App Background	#000000	Full screen

Card Background	#121212 → #1A1A1A	All cards
Border	#2A2A2A	Card outlines
Divider	#242424	Section separator

Accent Colors

Color	HEX	Used For
Blue	#3B82F6	Invite button, info icon
Green	#4ADE80	Success metrics
Yellow	#FACC15	Avatar background
Red	#E11D48	Equifax branding

Text Colors

Type	HEX	Usage
Primary	#FFFFFF	Titles, numbers
Secondary	#B3B3B3	Labels
Muted	#8A8A8A	Subtext
Disabled	#6B7280	Inactive data

HEADER COMPONENT

UI Structure

[X] Profile [⚙]

Purpose

- X → Close profile screen
- Profile → Screen title
- Settings icon → Navigate to settings page

Component Name

AppHeader

Props

title: string

onBack: function

onSettings: function

4 PROFILE CARD

Content

- Avatar (circular icon)
- Username: @aryanb_3iog0
- Right chevron

Purpose

- Displays logged-in user's identity
- Clicking opens detailed profile settings
- Avatar can later support editing

Component Name

UserProfileCard

Props

username: string
avatarUrl?: string
onPress: function

5 CREDIT SCORE CARD (Optional)

Content

- Label: "credit score"
- Score: "000"
- Subtext: "Not fetched yet, tap to begin"
- Equifax logo

Purpose

- Displays user's credit score
- If not fetched → prompts user to initiate fetch
- Clicking → triggers credit score onboarding flow

Functional States

State	Meaning
000	Not fetched
Real score	Display fetched value
Loading	Spinner
Error	Retry state

Component Name

CreditScoreCard

Props

score: number | null
status: "not_fetched" | "loading" | "fetched" | "error"
onFetch: function

6 WEB APP CARD (Skip)

Content

- Icon
- "Web app"
- Badge: EARLY ALPHA
- Chevron

Purpose

- Links user to web platform
- Badge indicates experimental feature
- Navigation: Open external web URL

Component

`FeatureLinkCard`

7 ACTION BUTTON ROW

Invite Button

Purpose

- Allows user to invite others
- Blue text indicates positive action

Contacts Button

Purpose

- Opens saved contacts
- Used for sharing / inviting

Component

ActionButton

Props:

icon

label

variant: "primary" | "secondary"

onPress

8 SECURE CONNECTIONS SECTION

Section Purpose

Shows how many financial data sources are connected.

This represents:

Data aggregation status

Grid Cards

1 Bank Accounts (2)

- Shows number of linked bank accounts
- Clicking → manage accounts

2 Credit Cards (1)

- Shows linked credit cards

3 Investments (0)

- Investment accounts

4 Credit Reports (0)

- Stored credit reports
-

Component

ConnectionMetricCard

Props:

icon
title
count
onPress

Behavior

- Count > 0 → active state
 - Count = 0 → muted styling
-

9 STATISTICS SECTION

Purpose

Shows user data processing health.

Stat 1: 100% Transactions tagged

Meaning:
All transactions categorized successfully.

Purpose:
Indicates clean financial categorization.

Stat 2: 99% Transactions have merchants

Meaning:
Almost all transactions mapped to merchant names.

Purpose:
Data enrichment health indicator.

Component

StatisticCard

Props:

icon
percentage
label
clickable?: boolean

10 LAYOUT SYSTEM

Padding

- Screen horizontal: 16px
- Card padding: 16px
- Section gap: 24px
- Grid gap: 12px

Border Radius

- Standard: 16px
 - Small badge: 8px
 - Circular icons: 50%
-

11 NAVIGATION FLOW

Element	Action
Close (X)	Back
Settings	Go to settings
Profile card	Open profile details
Credit score	Start credit fetch
Web app	Open web

Invite	Open invite flow
Contacts	Open contacts
Metric cards	Open respective management pages
Merchant stat	Navigate to merchant analytics

DATA MODEL (AI-Friendly)

Example data structure:

```
User {  
  username: string  
  avatar: string  
}
```

```
CreditScore {  
  value: number | null  
  status: "not_fetched" | "loading" | "fetched" | "error"  
}
```

```
Connections {  
  bankAccounts: number  
  creditCards: number  
  investments: number  
  creditReports: number  
}
```

```
Statistics {  
  taggedPercentage: number  
  merchantPercentage: number  
}
```

UX DESIGN INTENT

This screen communicates:

- User identity
- Financial connectivity status
- Credit readiness

- Data health
- Feature expansion
- Trust (Equifax branding)
- Security (secure connections section)

It builds:

- ✓ Transparency
 - ✓ Trust
 - ✓ Data visibility
 - ✓ Feature discoverability
-

14 REUSABLE DESIGN SYSTEM COMPONENTS

- AppHeader
 - BaseCard
 - GradientCard
 - MetricGridCard
 - StatisticCard
 - Badge
 - IconCircle
 - ActionButton
-

If you want next step, I can:

- Convert this into **Cursor prompt-ready structured instruction**
- Generate **Next.js + Tailwind TSX layout**
- Create **Design Token JSON**
- Create **Figma-ready documentation**
- Or optimize it specifically for your petrol expense app**

Tell me your next move 🕯
