Exclude from Cash Flow

Since you have tagged this transaction as Self Transfer, we have automatically excluded it from your Cash Flow.

TRANSACTIONS MODULE – COMPLETE SPECIFICATION

1 SCREEN PURPOSE

The Transactions screen is used to:

- Display all financial transactions
- Allow search & filtering
- Group transactions month-wise
- Show transaction metadata (type, tags, notes)
- Navigate to detailed transaction view
- Add new transaction manually
- Enable transaction selection (bulk actions)

This is the **core ledger view of the app**.

2 TRANSACTIONS LIST SCREEN

◆ 2.1 HEADER SECTION

Component: **TransactionsHeader**

UI Layout

Transactions [Select Icon] [Add Icon]

Elements

Element	Purpose
---------	---------

Back button (if navigated)	Return
Title: "Transactions"	Screen title
Select icon	Enables multi-select mode
Add (+) icon	Add manual transaction

Props

```
TransactionsHeader {
  onSelectPress: () => void
  onAddPress: () => void
}
```

◆ 2.2 SEARCH BAR

Component: **TransactionSearchBar**

UI

- Rounded input
- Placeholder: "Search transactions"
- Search icon (left)
- Filter icon (right circle button)

Purpose

- Search by:
 - Merchant name
 - Notes
 - Amount
 - Tags
 - Account
 - Filter transactions
-

◆ 2.3 TAB SWITCHER

Tabs:

- All
- Groups

Purpose

Tab	Meaning
All	Flat list
Groups	Grouped transactions

◆ 2.4 ADS / BANNER CARD

Grey rounded banner:

“We may use this space to show ads. Fold Plus shows no ads.”

Purpose

- Promotional area
 - Can be hidden for premium users
-

◆ 2.5 MONTH GROUP HEADER

Example:

February 2026 73 transactions

Component: `MonthSectionHeader`

Props:

```
MonthSection {  
  month: string  
  transactionCount: number  
}
```

◆ 2.6 TRANSACTION LIST ITEM

Component: **TransactionListItem**

UI STRUCTURE

[Merchant/Name] [Timestamp]
Amount (bold)
[Tag Badge] [Icons]

Example Data (From Screenshot)

Field	Example
Name	Myself
Timestamp	Today, 10:09AM
Amount	-₹16,983.60

Secondary	Bank reference
Notes indicator	Red icon

AMOUNT RULES

Type	Format	Color
Debit	-₹	White (slightly muted)
Credit	+₹	White
Large debit	Bold	
Currency	₹ prefix	

TAG BADGE

Example:

- SELF TRANSFER
- RETURN

Style

- Black background
 - Rounded pill
 - White text
 - Small icon inside
-

SIDE ICONS

Possible icons:

- Note exists
 - Info
 - Muted transaction
 - Category icon
-

Layout Specs

- Card background: Dark gradient
 - Padding: 14–16px
 - Radius: 16px
 - Divider line between items
-

Props

```
TransactionListItem {  
  id: string  
  title: string  
  timestamp: string  
  amount: number  
  type: "credit" | "debit"  
  tag?: string  
  hasNote?: boolean  
  accountName?: string  
}
```

3 TRANSACTION DETAIL SCREEN

◆ 3.1 TOP SUMMARY CARD

Component: **TransactionSummaryCard**

Layout

Amount (Large)
Tag (SELF TRANSFER)

FROM ON
Account Date

PAID TO
Recipient

Amount

Example:

-₹16,983.60

- Font size: 28–32px
 - Bold
 - Center aligned
-

Tag

SELF TRANSFER (Badge)

DETAILS GRID

Row 1

FROM ON

***7597 Fri, Feb. 27 '26

Row 2

| PAID TO |

| Myself |

◆ 3.2 ACTION OPTIONS LIST

Each row is clickable:

Option	Purpose
Account in	Change month grouping
More Details	Expand metadata
Add transaction to group	Add to group
Notes	Add/edit notes
Add receipt	Upload receipt

Notes Section

"Something about this transaction you would like to recall later?"

Button:

ADD RECEIPT (blue text)

◆ 3.3 EXCLUDE FROM CASH FLOW

Toggle switch component.

Description

Since transaction tagged as Self Transfer, it is auto excluded from cash flow.

Logic

If tag === SELF_TRANSFER:
excludeFromCashFlow = true

Props

```
TransactionDetail {  
  id: string  
  amount: number  
  tag: string  
  fromAccount: string  
  date: Date  
  paidTo: string  
  notes?: string  
  excludeFromCashFlow: boolean  
}
```

4 DATA MODEL STRUCTURE

Transaction Model

```
Transaction {  
  id: string  
  amount: number  
  type: "credit" | "debit"  
  date: Date  
  merchant: string  
  accountId: string  
  category?: string  
  tag?: "SELF_TRANSFER" | "RETURN" | "PAYMENT"  
  notes?: string  
  receiptUrl?: string  
  excludedFromCashFlow: boolean  
  createdAt: Date  
}
```

UI State Model

```
TransactionsState {  
  selectedIds: string[]  
  searchQuery: string  
  activeTab: "all" | "groups"  
  monthSections: MonthSection[]  
}
```

5 INTERACTION FLOW

From List → Detail

Tap item → Open detail page

Select Mode

Tap select icon →
